On the individual area pages, each component will be rated individually. An overall rating for each area will be determined by averaging rating values (N/A not scored; Unacceptable=0; Acceptable=1; Recognized=2; Exemplary=3).

On the summary page, the overall rating for each area will be recorded (as determined by the formula delineated above). A cumulative summary rating will be derived by averaging and rounding holistic rating values. *(Rating values remain the same as described above)*
