

Apple Mobile Device How-To

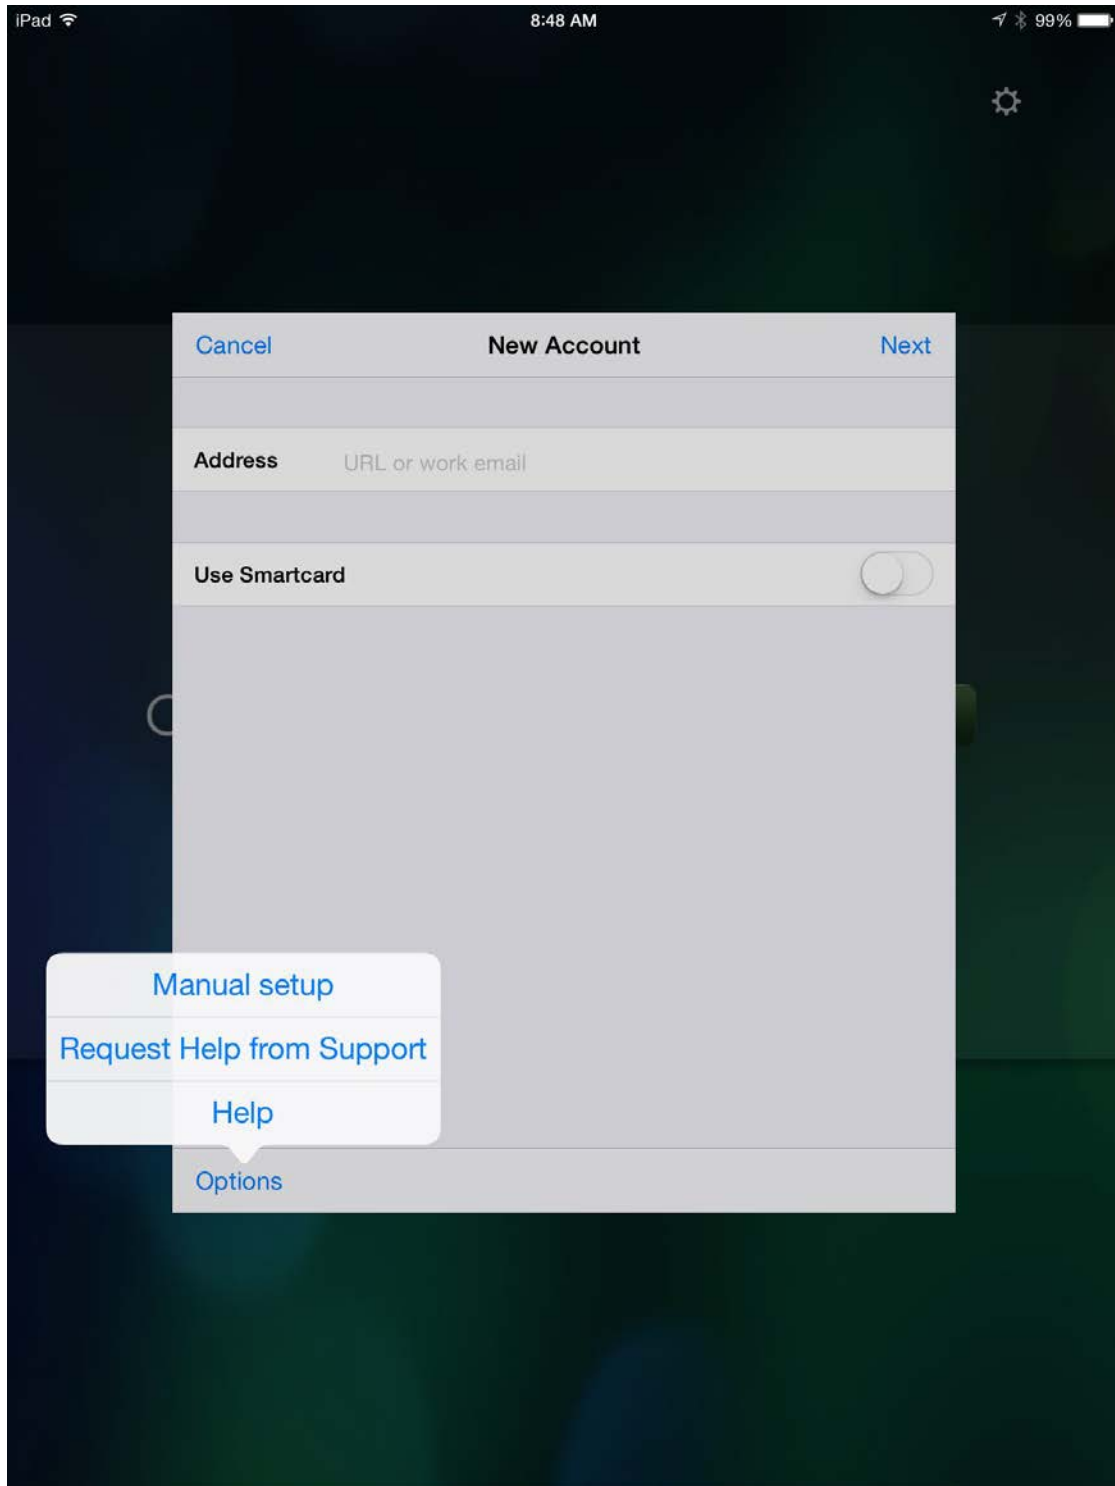

1) Go to the Apple app store and search for the citrix receiver app and download the app to your device

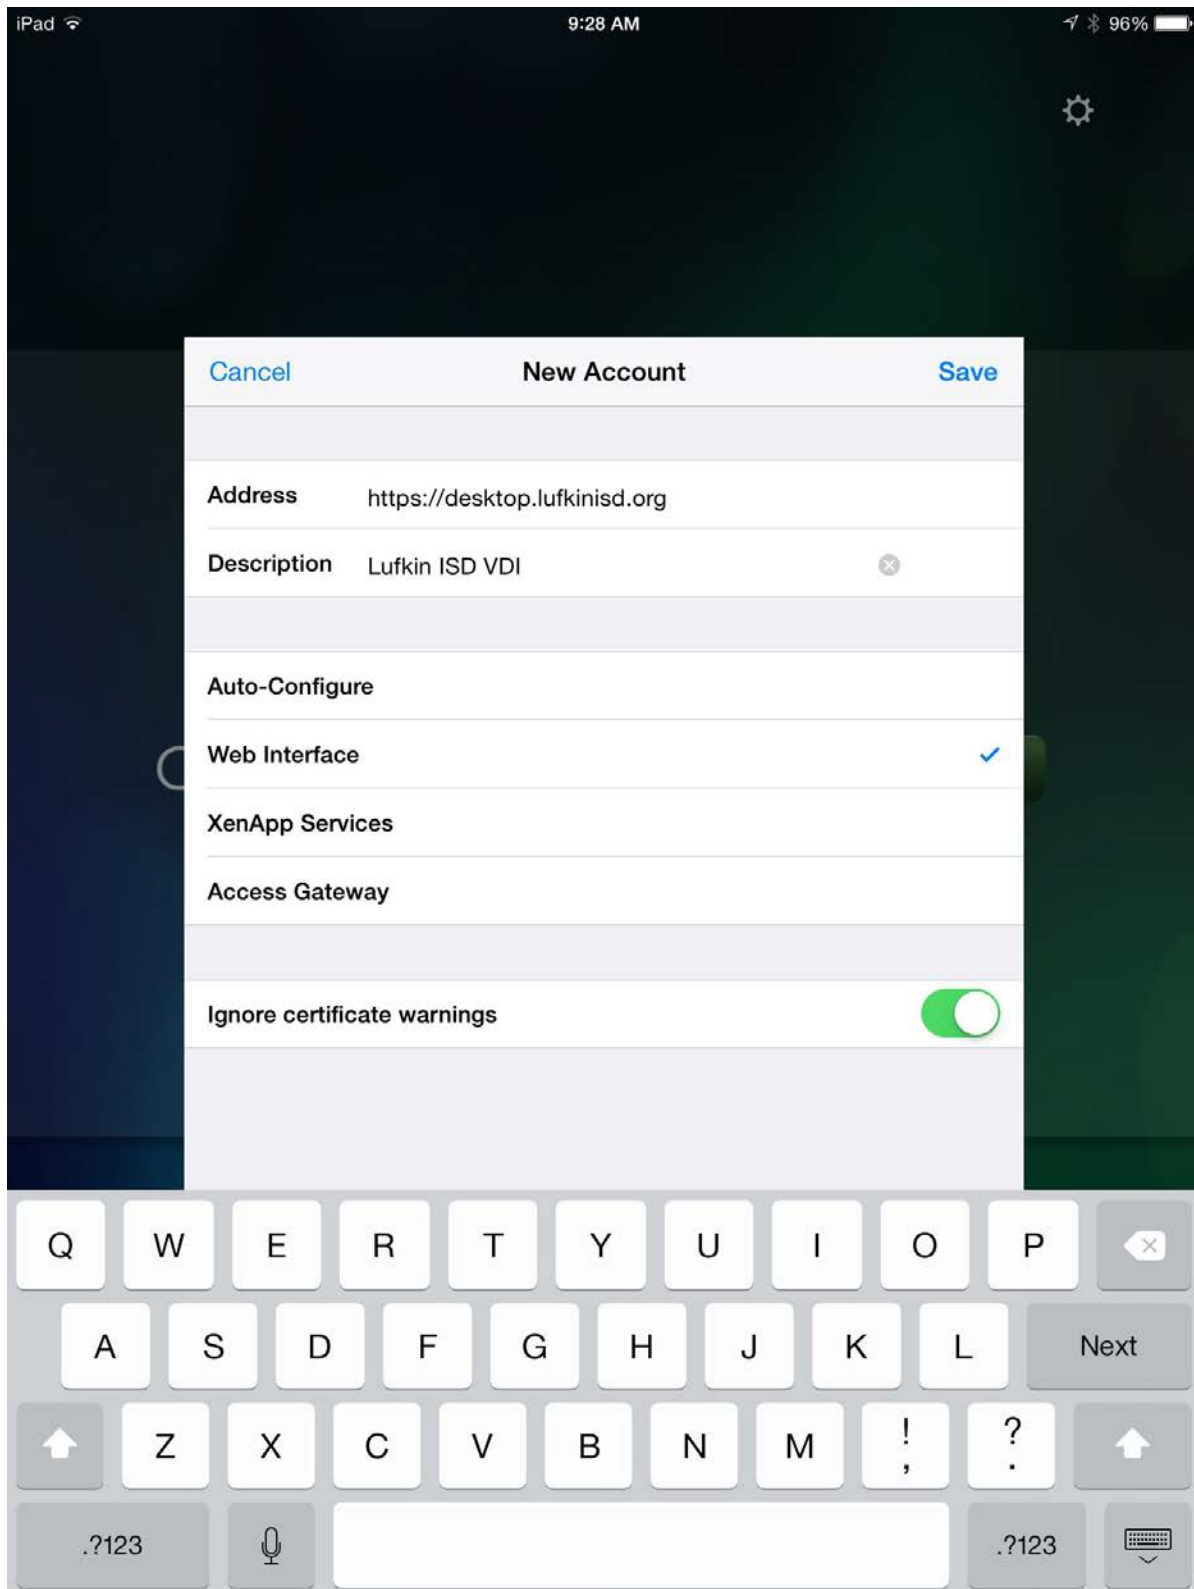

2) Once the app is downloaded, click on the Add Account button

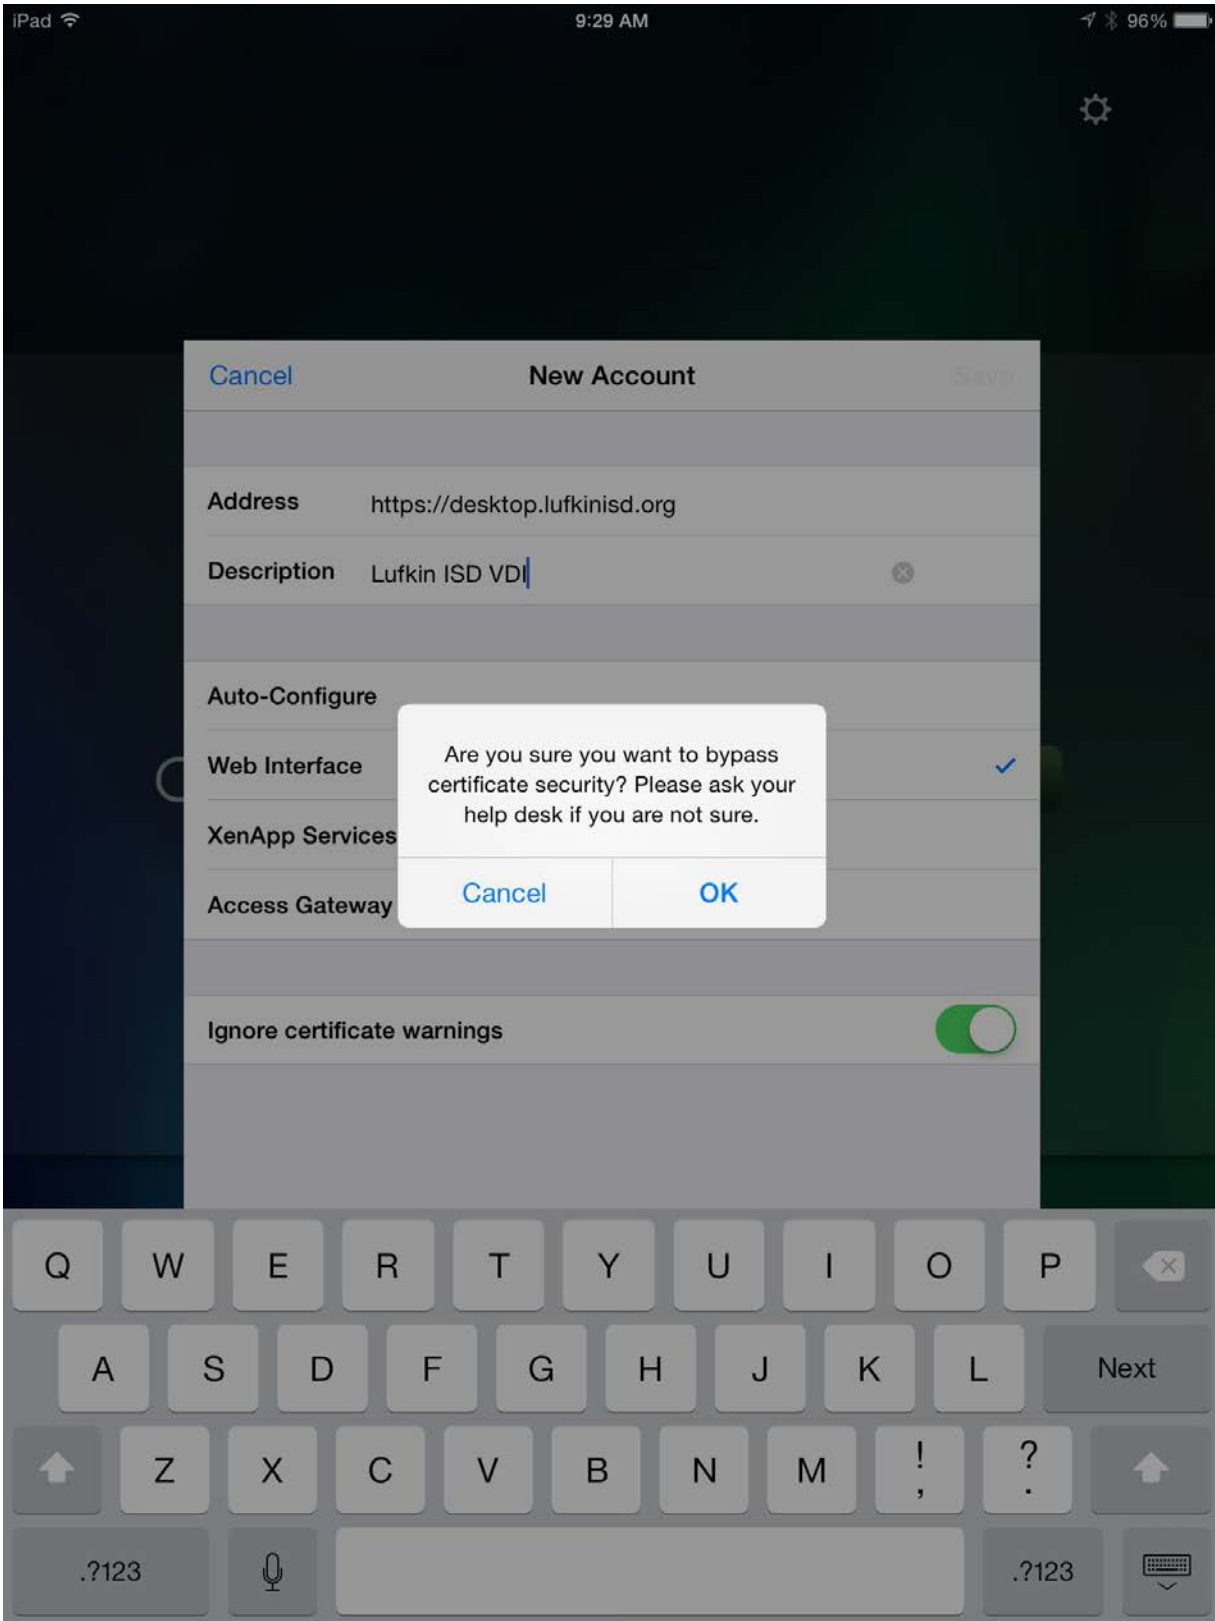

3) On the New Account window click on the options link in the lower left corner and select Manual Setup

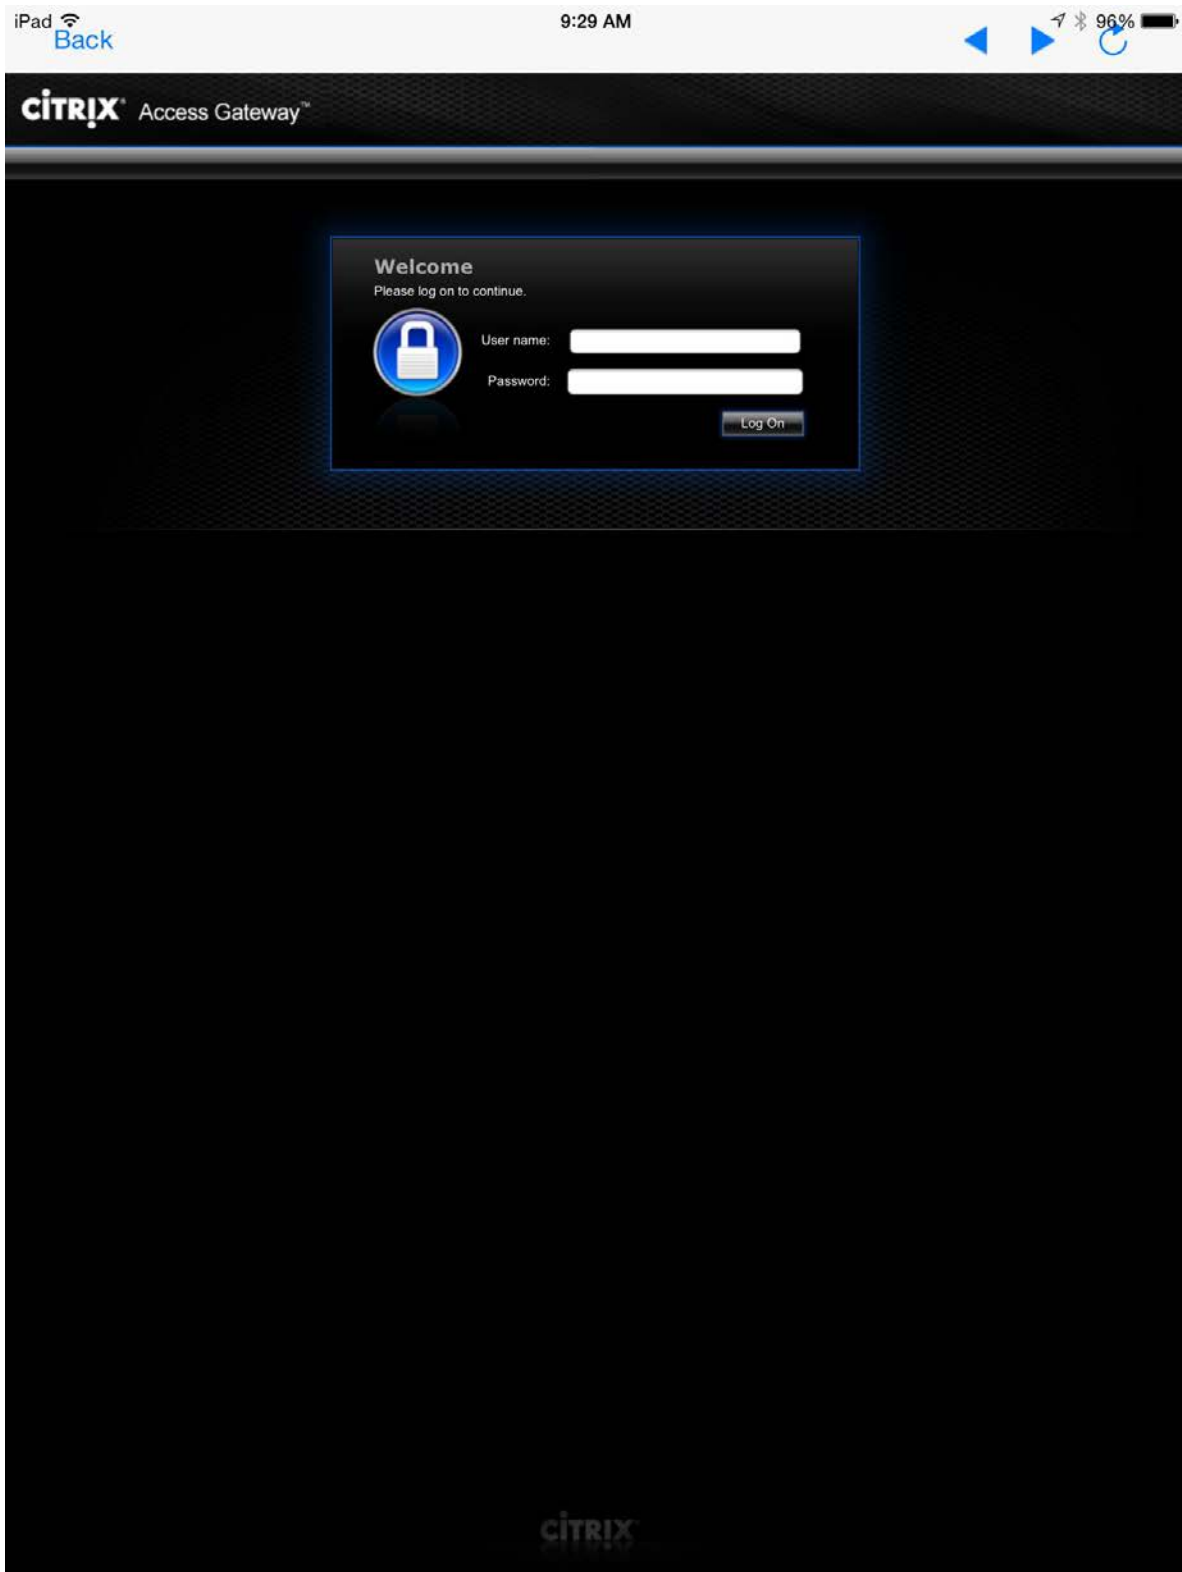

4) On the manual setup screen, you will need to type in the server address, description, select web interface, and turn on ignore certificate warnings

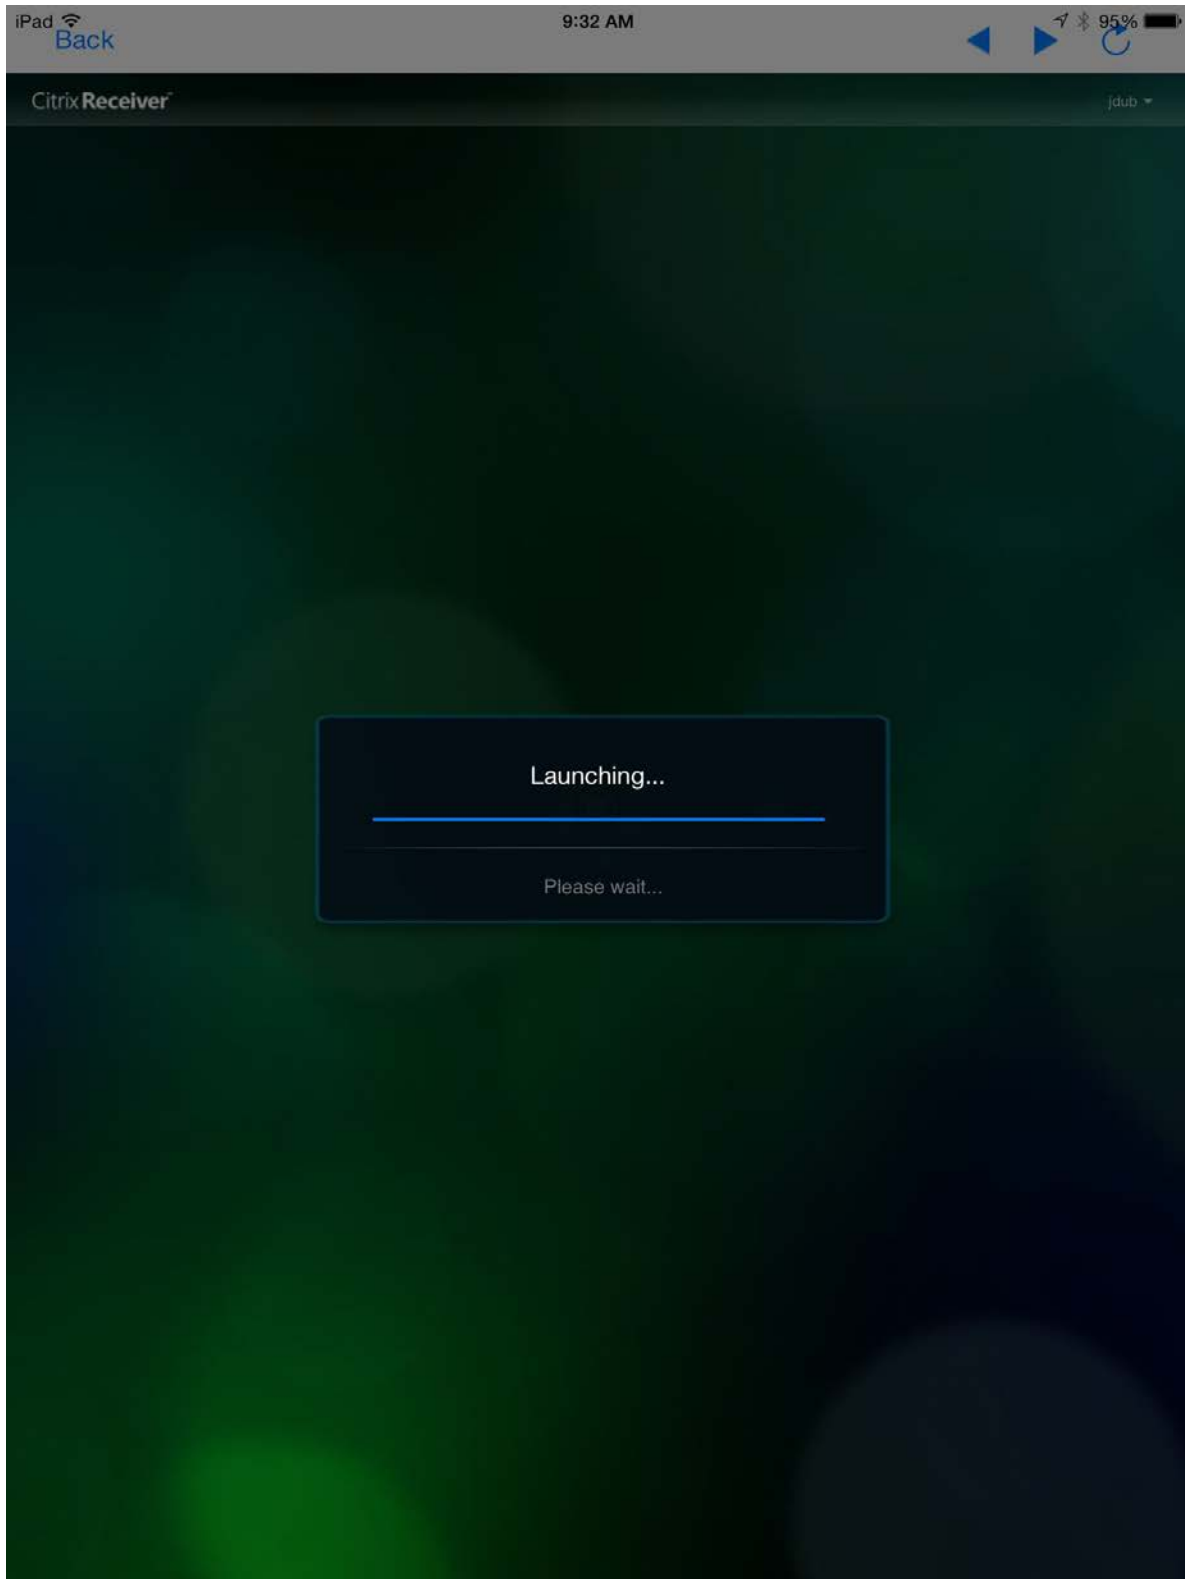

5) Click on OK to bypass certificate security

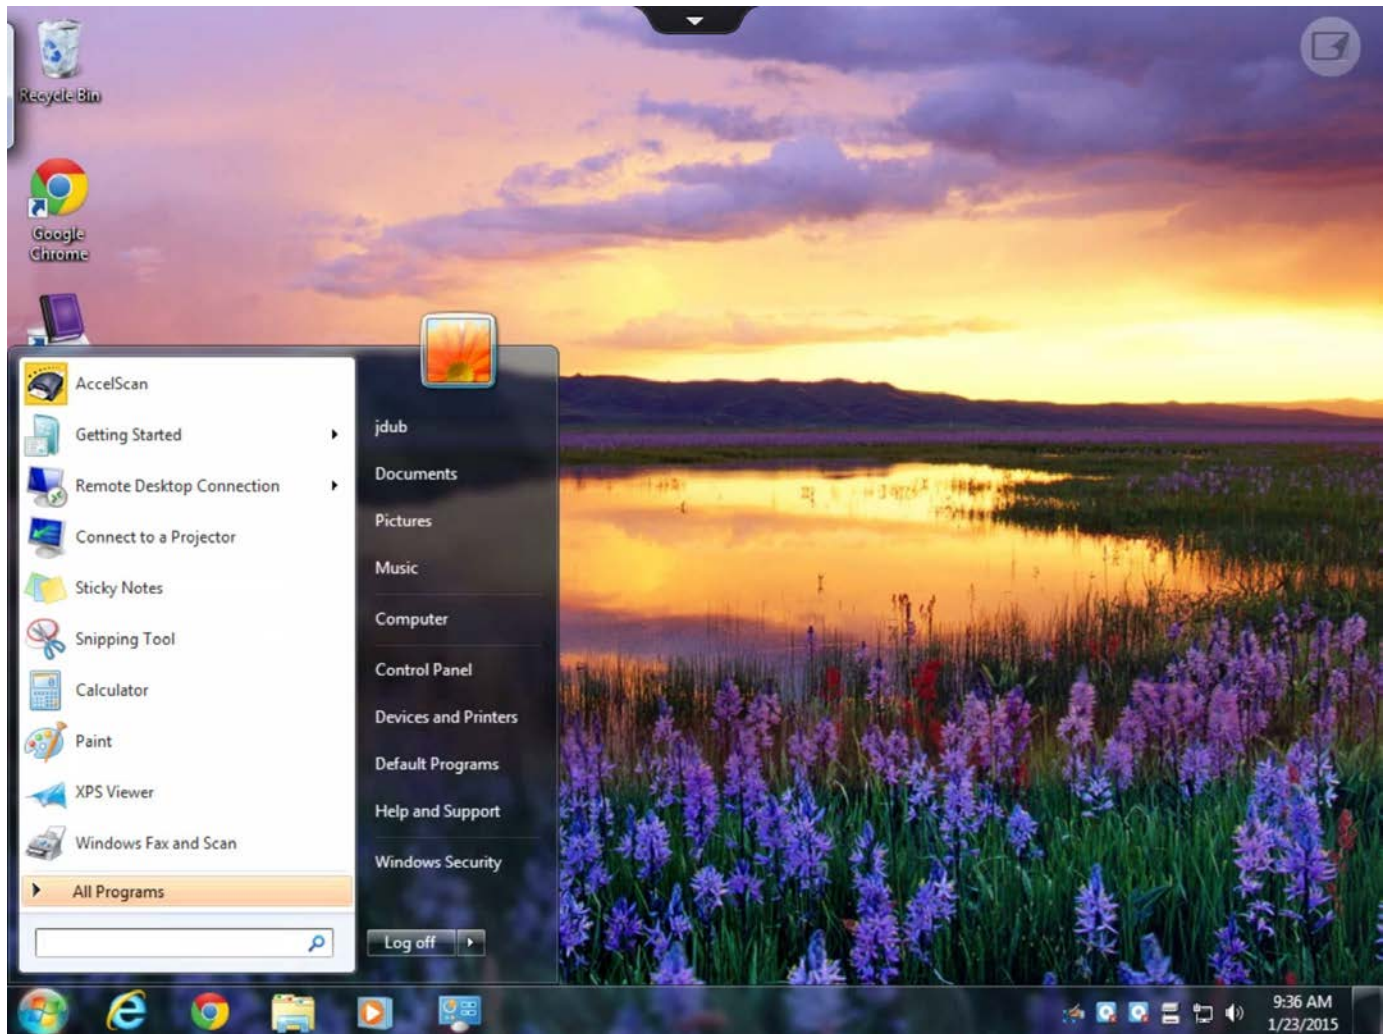

6) When the login page loads, type in your username and password to login (This is the same username and password that you use to login to the computer and your email)

7) Once you login, the Citrix app will auto launch the connection and log you into the desktop (if for some reason it does not auto launch just click on the desktop icon to launch the desktop)

8) Once your desktop loads, you can pull up your network folders, h drive, email, etc.... When you are done just click the start button and select logoff and you will be logged out of the desktop

9) The next time you launch the Citrix receiver app you may have to select the person in the upper right hand corner and select the VDI account you created to start the login process
